ADVANTAGES OF THE MATERIAL

1 coat oil impregnates, protects and renew any wooden surfaces

1

Enhanced protection against **UV rays**

2

Hardens inside the wood, not on the wood

3

4

For **horizontal and vertical** exterior surfaces

5

Ensures hard-wearing, dirt and water-repellent coating

6

Non-slip coating even after rain

PROPERTIES OF MATERIALS

- In 1 coat, penetrates deep into the wooden surface, protecting it from within;
- Provides preventive protection against mold, prevents the occurrence of blue timber, mold and rot;
- Without cracking, flaking off, washing out later;
- Leaves wood pores open, gives the wood ability to breathe;
- Impregnates the wood, maintains its natural moisture, prevents it from drying out;
- Bring out the natural beauty and the texture of the wood;
- Economical single-layer coating, saves time and money for a full cycle of work;
- For exterior use.

Packaging Size 2-in-1:

Clear transparent oil + Tint Base
0.75 l (0.675 l + 75 ml of free volume for colorants);
2.5 liters (2.25 liters + 250 ml of free volume for colorants).

Coverage m²/L / 1 coat application:

15-18 m² depending on wood type;
13,5 m² / 0,75 L (with colorants);
45 m² / 2,5 L (with colorants).

Where to use:

the perfect solution for protecting and transforming

- smooth and rough wood facades;
- decks;
- garden furniture;
- windows and doors;
- fences and more.

Type of surface:

suitable for new, old wooden surfaces, fiberboard.

Visual effect / tinting:

2-in-1 Clear oil + Tint Base: transparent color finish that emphasizes the grain of the wood.

Gloss: Satin sheen

Tint base clear - base for tinting in any shades, including deep and dark shades. Suitable for tinting with any European tinting systems.

Clear oil

On a new, previously untinted wood: creates a satin finish with a slight golden tint on the surface. On very light color woods, such as pine, the color may be deeper gold.

On tinted wood: enhances the color of tinted wood, making it deeper.
